

### **coating and drying defects pdf**

Wood drying (also seasoning lumber or wood seasoning) reduces the moisture content of wood before its use. When the drying is done in a kiln, the product is known as kiln-dried timber or lumber, whereas air drying is the more traditional method.. There are two main reasons for drying wood: Woodworking when wood is used as a construction material, whether as a structural support in a building ...

Spray painting is a painting technique where a device sprays a coating (paint, ink, varnish, etc.) through the air onto a surface. The most common types employ compressed gas "usually air" to atomize and direct the paint particles. Spray guns evolved from airbrushes, and the two are usually distinguished by their size

and the size of the spray pattern they produce.

### **Spray painting - Wikipedia**

The surface topography maps in Fig. 1 show multiple features and defects that are present in the device, examples of which are labelled A-F in Fig. 1(c). The silica microspheres (e.g.  $\text{SiO}_2$ ) are clearly visible as circular features in the MoO<sub>x</sub>/Ag and active layer images but absent from the ZnO and ITO, as expected from the layer deposition sequence.
