A buck converter (step-down converter) is a DC-to-DC power converter which steps down voltage (while stepping up current) from its input (supply) to its output (load). It is a class of switched-mode power supply (SMPS) typically containing at least two semiconductors (a diode and a transistor, although modern buck converters frequently replace the diode with a second transistor used for ...

Receptor theory is the application of receptor models to explain drug behavior. Pharmacological receptor models preceded accurate knowledge of receptors by many years. John Newport Langley and Paul Ehrlich introduced the concept of a receptor that would mediate drug action at the beginning of the 20th century. A J Clark was the first to quantify drug-induced biological responses (using an ...

The participants for this project were a group of four high school science teachers from a private, comprehensive, urban high school in Southern California (enrolment = 1150). The group included three men and one woman, all experienced teachers, ranging from 8 to 34 years in the profession. They represented three different subject areas—chemistry, biology, and physics (see Table 1).
