In a case study published in the December 2009 issue of Hydraulics & Pneumatics, a new hydraulic excavator was shipped to site filled with the wrong type of hydraulic oil. The consequence of this mistake was four main pump failures at a cost of \$20,000 each, three swing motor failures, and two track drive motor failures all within the first 27 months of operation.

Failure mode and effects analysis (FMEA)"also "failure modes", plural, in many publications"was one of the first highly structured, systematic techniques for failure analysis.It was developed by reliability engineers in the late 1950s to study problems that might arise from malfunctions of military systems. An FMEA is often the first step of a system reliability study.
