DSST EXAM CONTENT FACT SHEET DSST® INTRODUCTION TO COMPUTING

General-purpose computing on graphics processing units (GPGPU, rarely GPGP) is the use of a graphics processing unit (GPU), which typically handles computation only for computer graphics, to perform computation in applications traditionally handled by the central processing unit (CPU). The use of multiple video cards in one computer, or large numbers of graphics chips, further parallelizes the ...

A sequence of steps to achieve complete some work or obtain some result is called an algorithm. This is how programming is related to algorithms. Programming involves describing what you want the computer to do by a sequence of steps, by algorithms.. Programmers are the people who create these instructions, which control computers. These instructions are called programs.
