### **'Development Through Life' by Newman & Newman**

Life expectancy is a statistical measure of the average time an organism is expected to live, based on the year of its birth, its current age and other demographic factors including gender. The most commonly used measure of life expectancy is at birth (LEB), which can be defined in two ways. Cohort LEB is the mean length of life of an actual birth cohort (all individuals born a given year) and ...

The life course approach, also known as the life course perspective or life course theory, refers to an approach developed in the 1960s for analyzing people's lives within structural, social, and cultural contexts. The origins of this approach can be traced back to pioneering studies of the 1920s such as Thomas' and Znaniecki's "The Polish Peasant in Europe and America" and Mannheim's essay on ...
