Fatty Liver Diet Guide

Our efforts to more rapidly and effectively respond to health threats currently reach over 60 countries. We train field epidemiologists around the world, giving them the necessary skills to collect, analyze and interpret data and contribute to evidence-based decisions.

Field Epidemiology Training Program (FETP) | Division of

The liver, an organ only found in vertebrates, detoxifies various metabolites, synthesizes proteins, and produces biochemicals necessary for digestion. In humans, it is located in the right upper quadrant of the abdomen, below the diaphragm. Its other roles in metabolism include the regulation of glycogen storage, decomposition of red blood cells and the production of hormones.
