Pain is associated with a wide range of injury and disease, and is sometimes the disease itself. Some conditions may have pain and associated symptoms arising from a discrete cause, such as postoperative pain or pain associated with a malignancy, or may be conditions in which pain constitutes the primary problem, such as neuropathic pains or headaches.

Disclaimer: The information here is NOT meant to replace the sound advice of a billing and coding expert.. Below is a list of the most common ICD-10 codes (diagnostic codes) used in physical medicine & rehabilitation (PM&R) and interventional pain management clinics. Obviously, because of the overlap in conditions treated, this list will be handy for orthopedic and rheumatology clinics as well.
