E-Cronicon is dedicated towards the promotion of open access publication of research that reduces the frontier to assess the dossier needed and carry out the research work in any field.

ECronicon Open Access | Scientific Publications : Online

At the moment, a number of NGS platforms are available. The most important properties of several NGS platforms, such as output and fragment length, are presented in Table 1 (Bertelli and Greub, 2013, Dark, 2013, Junemann et al., 2013, Loman et al., 2012). The different NGS platforms use different sequencing technologies.

Application of next generation sequencing in clinical

Heartly Congratulations to Progressive Education Society's Modern College of Arts, Science and Commerce, Ganeshkhind, Pune 16 for being the proud recipient of the CHHATRAPATI SHIVAJI MAHARAJ VANASHREE AWARD conferred upon by Social Forestry, Forest Department Maharashtra State for their contribution towards Student's, Women Welfare and Environment related initiatives through Plant Nursey, Tree ...

The social history of viruses describes the influence of viruses and viral infections on human history. Epidemics caused by viruses began when human behaviour changed during the Neolithic period, around 12,000 years ago, when humans developed more densely populated agricultural communities. This allowed viruses to spread rapidly and subsequently to become endemic.

Social history of viruses - Wikipedia

Oxidative stress is a normal phenomenon in the body. Under normal conditions, the physiologically important intracellular levels of reactive oxygen species (ROS) are maintained at low levels by various enzyme systems participating in the in vivo redox homeostasis. Therefore, oxidative stress can also be viewed as an imbalance between the prooxidants and antioxidants in the body.

Oxidative Stress, Prooxidants, and Antioxidants: The Interplay

Improved control measures starting in the 1990s have greatly reduced the prevalence of *L. monocytogenes* in many food categories, particularly in meats and meat products. However, the rate of listeriosis has remained constant during the last decade and the more severe, systemic (invasive) form of listeriosis is now recognized as occurring more frequently in small outbreaks than previously ...

A review of *Listeria monocytogenes* : An update on

Int.J.Curr.Microbiol.App.Sci (2018) 7(1): 506-510 508 end of 30 days cycle. On the other hand, the EID50 of

all the five isolates detected up to the end of the cycle.

Listeria monocytogenes is the species of pathogenic bacteria that causes the infection listeriosis. It is a facultative anaerobic bacterium, capable of surviving in the presence or absence of oxygen. It can grow and reproduce inside the host's cells and is one of the most virulent foodborne pathogens, with 20 to 30% of foodborne listeriosis infections in high-risk individuals may be fatal.

Listeria monocytogenes - Wikipedia

Ding and colleagues demonstrate that induced pluripotency can be achieved through targeted activation of endogenous Oct4 or Sox2 genes. With CRISPR activation, the promoter and enhancer are specifically remodeled, Oct4 or Sox2 is derepressed in fibroblasts, and reprogramming is triggered toward pluripotency.

CRISPR-Based Chromatin Remodeling of the Endogenous Oct4

Surgical site infection (SSI) is the second most common infectious complication after urinary tract infection following a delivery by caesarean section (CS). At Bugando Medical Centre there has been no study documenting the epidemiology of SSI after CS despite the large number of CSs performed and the relatively common occurrence of SSIs. This was a prospective cohort study involving pregnant women ...

Incidence and predictors of surgical site infections

Zur Kultivierung von *Serratia* sind keine besonderen Wachstumsfaktoren notwendig, so dass einfache Nährmedien auf Pepton-Basis, wie Trypton-Soja-Agar geeignet sind. Es sind auch Minimalmedien definiert, die genau die chemischen Verbindungen enthalten, die für das Wachstum nötig sind. Außerdem sind *Serratia*-Arten, mit Ausnahme von *S. fonticola*, resistent gegenüber Thalliumsalzen.

Serratia â€“ Wikipedia

A *Listeria monocytogenes* fakultatív anaerob, intracelluláris *ÃskÃd* baktÃrium, ami a listeriázis károkozja. A legvirulensebb *Ãlelmiszer* terjedő patogének egyike, a *Listeria*-fertőzések a klinikai esetek 20-30 százalékában halálal végződnek. A fertőzés kialakulása nagyban függ a baktériumok számától és az általános egészségi állapottól.

Listeria monocytogenes â€“ Wikipedia

Unite with speakers, scientists, researchers, pathologists from all over Europe, Asia, USA & Middle East at International Pathology Conferences, EuroSciCon Conference Pathology 2019 will be conducted on theme: Dedicated to Discovery. Committed to Pathology
