Educational psychology is the branch of psychology concerned with the scientific study of human learning. The study of learning processes, from both cognitive and behavioral perspectives, allows researchers to understand individual differences in intelligence, cognitive development, affect, motivation, self-regulation, and self-concept, as well as their role in learning.

Overview. Psychology borders on various other fields including physiology, neuroscience, artificial intelligence, sociology, anthropology, as well as philosophy and other components of the humanities. The history of psychology as a scholarly study of the mind and behavior dates back to the Ancient Greeks. There is also evidence of psychological thought in ancient Egypt.

No event in the twentieth century did more to popularize conspiracy theories and confuse the general public than the assassination of President Kennedy. By educating people about what actually happened to JFK, and how conspiracy theorists have deliberately lied about it, James K. Lambert hopes that we can also get the general public to better see the lies (aka "fake news") of today.
