

solar desalination for the pdf

Desalination is a process that takes away mineral components from saline water. More generally, desalination refers to the removal of salts and minerals from a target substance, as in soil desalination, which is an issue for agriculture. Saltwater is desalinated to produce water suitable for human consumption or irrigation. One by-product of desalination is salt.

Solar energy is radiant light and heat from the Sun that is harnessed using a range of ever-evolving technologies such as solar heating, photovoltaics, solar thermal energy, solar architecture, molten salt power plants and artificial photosynthesis. It is an important source of renewable energy and its technologies are broadly characterized as either passive solar or active solar depending on ...

Desalination is dedicated to promoting leading edge progress on the globally important topic of water desalting since 1966. It focuses broadly on science and engineering, being both fundamental and applied in motivation, respecting that desalination today is a widely accepted practice by industry and communities, but in need of ongoing innovation at all levels to ensure economic and ...
