A tourniquet is a constricting or compressing device used to control arterial and venous blood flow to a portion of an extremity for a period of time. Pressure is applied circumferentially around a portion of a limb at a desired location; this pressure is transferred to the walls of blood vessels, causing them to become temporarily occluded or restricted.

Vasectomy is a surgical procedure for male sterilization or permanent contraception. During the procedure, the male vas deferens are cut and tied or sealed so as to prevent sperm from entering into the urethra and thereby prevent fertilization of a female through sexual intercourse. Vasectomies are usually performed in a physician's office, medical clinic, or, when performed on an animal, in a ...

Millions of surgical operations are performed every year to improve your health, beauty, and even your smile, but thereâ€™s a hidden danger in some of the most common procedures that can aggravate if not actually cause obstructive sleep apnea. Sleep apnea happens when your jaws are too narrow, which constricts the internal soft tissue layer that lines your upper breathing passageways, from ...
